#### **DETAILED ACTION**

#### **DETAILED ACTION**

#### Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to a method of treating a well, classified in class 166, subclass 305.1.
  - II. Claims 15 and 17, drawn to a pellet, classified in class 507, subclass 200.
  - III. Claims 16, drawn to a method of treating a pipeline, classified in class137, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I or III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case The product as claimed can be used in methods of placing chemicals in areas which are not in pipelines or wells.
- 3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Application/Control Number: 10/642,901 Page 3

Art Unit: 1712

the instant case the different inventions have modes of operations, within wells as opposed to within pipelines.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Gene Tyler on 9/6/05 a provisional election was made with traverse to prosecute the invention of I, claims 1-14. Affirmation of this election must be made by applicant in replying to this Office action. Claims 15-17 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/642,901

Art Unit: 1712

7. Claims 1, 2, 4-13 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/94744.

WO '744 teaches a method of treating a well comprising using a microcapsule containing chemicals, and weighting agents within the scope of the present invention (see pages 8-12). It is taught therein that the weighting agent allows for specific placement within the well.

8. Claims 1, 2, 4-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Heath (2004/0043906).

Heath teaches a method of treating a well comprising using a microcapsule containing chemicals, and weighting agents within the scope of the present invention. It is taught therein that the weighting agent allows for specific placement within the well (see paragraphs 0018-0022 and 0028).

9. Claims 1, 2, 9-11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Cantu (4986354).

Cantu teaches a method of treating a well comprising using a microcapsule containing chemicals wherein control of capsule size allows for placement in various areas of the well (column 3, lines 8-22 and the claims).

Application/Control Number: 10/642,901

Art Unit: 1712

## Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 1, 9 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01/94744, Heath or Cantu.

WO '744, Heath and Cantu are discussed above. These references differ from the present invention in that the use of 2 or more pellets having different additives is not specifically disclosed. It is well known to one of ordinary skill in the art that various chemicals such as scale inhibitors, corrosion inhibitors, bactericides, atc. May be added simultaneously to well treatment fluids in order to improve the downhole environment. It would thus be obvious to one of ordinary skill in the art to utilize more than one type of pellet disclosed in these references during the well treatment operation.

12. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C. Tucker whose telephone number is 571-272-1095. The examiner can normally be reached on Monday - Friday, Flexible schedule.

Application/Control Number: 10/642,901 Page 6

Art Unit: 1712

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
